

The Children's Hospital at Westmead Stage 2 Redevelopment

Fact Sheet | New Multi-storey Car Park | February 2022

New Kids' Hospital car park

The new multi-storey car park for The Children's Hospital at Westmead will provide at least 860 parking spaces to meet the hospital's current and future parking needs.

Conveniently located off Redbank Road, the new car park will have an attractive architectural façade, easy parking for vehicles and bikes, and the potential for a future coffee cart and artworks to create a lively atmosphere as you enter the hospital.

The site was selected because of its convenient location close to the hospital staff and Galleria entries. The site also meets our requirements for long-term precinct planning.

Work is expected to start in early 2022 and be completed by 2023.

The final design is yet to be decided, but the new car park would have at least 860 spaces.

Mobility parking for staff and visitors is a priority – the best strategy for mobility parking (including disabled parking) will be developed in consultation with our staff and families.

In the first instance, the new car park will be the preferred car park for staff parking, while P6 on Hainsworth Street will continue to be the preferred visitor parking because it's closest to the main entry.

The project includes new landscaping, pathways and playground improvements.

What you need to know

- The new car park will be located on Redbank Road at the rear of the hospital.
- It replaces the previous P17 car park.
- P6 on Hainsworth Street will continue to be the preferred visitor car park because it is closest to the main entry.
- Safety is our first priority, and we will keep you up to date with any changes that may affect you.
- The project is part of The Children's Hospital at Westmead Stage 2 Redevelopment which includes the new Paediatric Services Building and an improved main entry forecourt.

For staff

The new car park will mean an end to interim parking arrangements for staff. There will be no need to walk or bus from the rear of the campus.

The new car park also replaces parking spaces lost to redevelopment (including P17), plus extra spaces for current and future parking needs.

Playground relocation

The existing playground at the back of the hospital will be closed during construction as it is too close to the development site. Temporary playground options are now being explored.

A new playground will be created as part of the car park development, and will include equipment for a range of age groups and abilities. Elements of the existing George Gregan playground will also be transferred. For more information about plans for the playground, please visit the website.

During construction

Safety and patient comfort is our first priority and there will be strict measures in place to manage construction activity.

Pedestrian pathways will change. For staff who park outside the hospital and walk in, this will mean a change to entries, but temporary paths will be clearly marked.

Construction will start in early 2022 and we will keep you up-to-date with any changes as the project progresses. Visit our website westmeadproject.health.nsw.gov.au closer to the time for information about our COVID-safe procedures, and our plans for monitoring noise, dust, vibration and construction traffic.

The big picture

Our transport plan includes parking to meet the current and future needs of the hospitals, and replace parking areas which are needed for redevelopment.

But in the future, we need to reduce reliance on cars whenever possible, and promote opportunities to walk and cycle, or use bus, train, Parramatta Light Rail and the future Sydney West Metro.

Precinct planning will focus on creating a new civic heart for Westmead, with a walkable, well-connected and accessible health and education precinct, and a revitalised, high amenity living and employment centre.

Site plan

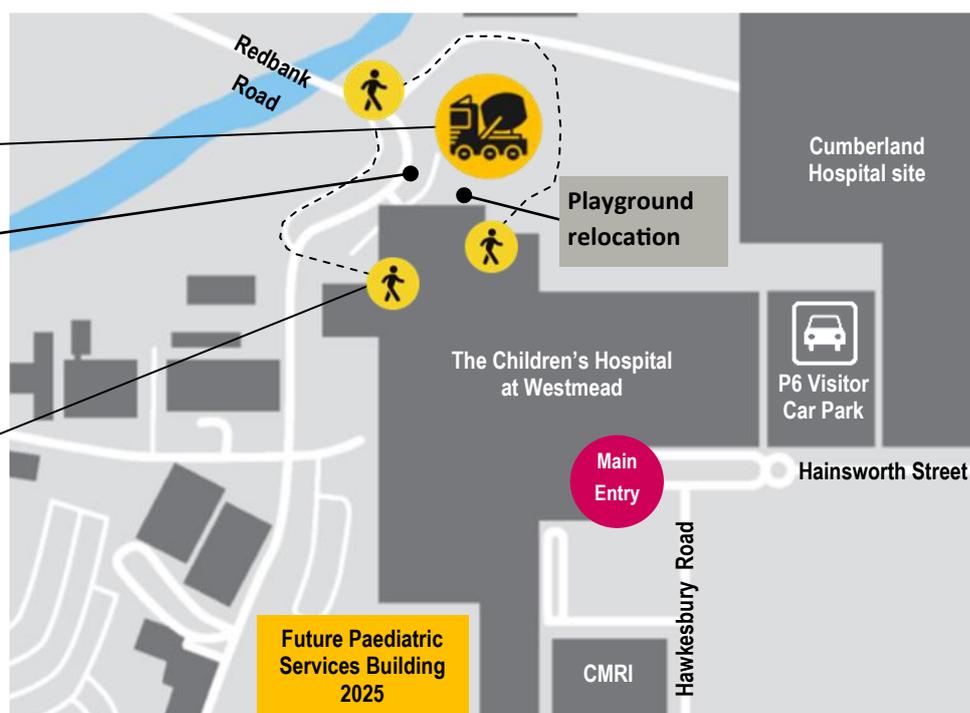

New car park construction area

Redbank Road realignment and Lodge demolition in this area

Safe temporary pathways for staff and public pedestrian access from Redbank Road will be advised closer to the time

Staff entry via doors near loading dock and public entry via Galleria will be maintained

For more information about how we are managing construction, visit the project website.
